

Figure 1 is a perspective view of a glass container 50. The container is partially filled with a liquid 51. A solid object 52, which appears to be a piece of fruit or a vegetable, is submerged in the liquid. The container has a wide mouth and a slightly tapered body. The liquid level is indicated by a horizontal line. The solid object 52 is partially submerged, with its top portion above the liquid surface. The container is shown sitting on a flat surface.

```

1 preparing polyethylene wax, cyanide polymer and white wax

2 mixing the polyethylene wax, cyanide polymer and white wax to be a mixture by way of heating

3 pouring the mixture in a mold and obtaining a wax item with fixed shape when removing the mold

4 melting a colloid material to be a transparent liquid

5 coating the colloid material onto an outer periphery surface of the wax item and the colloid material being not mixed with the wax item

6 condensing the colloid material which is fixed on the wax item

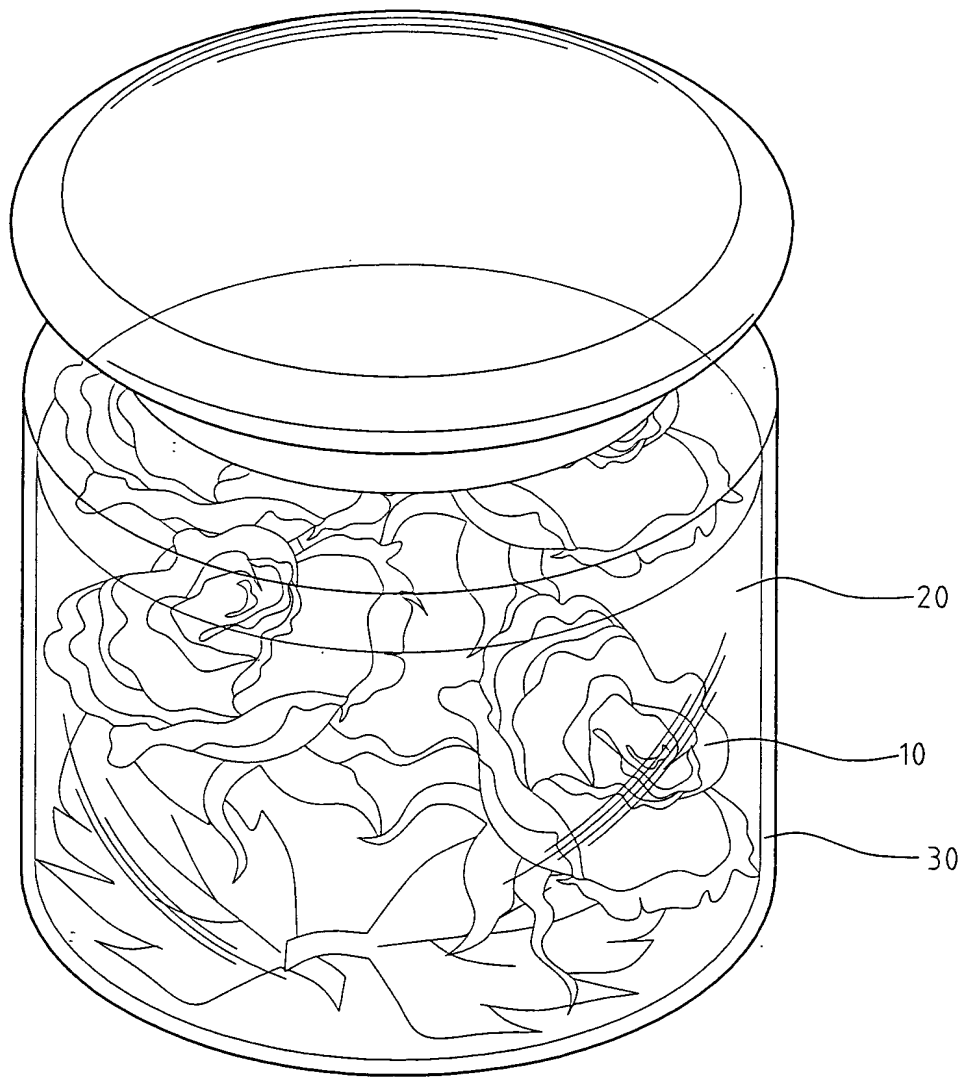

FIG. 4

A perspective view of a container 10, which is a cylindrical jar with a flat lid. The container is filled with a liquid 20. Inside the liquid, there are several fruit-like objects 30, which are pear-shaped and have a small stem at the top. The objects are arranged in a cluster, with some partially submerged and others more visible above the liquid surface.

FIG. 5

A perspective view of a container 10 filled with a plurality of objects 20. The objects 20 are arranged in a grid-like pattern. A central object 20 is highlighted with a thick black line. A label 40 points to the top of the container 10.
